

1. Food Delivery App Home Page — HTML & CSS

Save this as **index.html**. It includes a hero section, navigation, search box, popular cuisines, and a clear CTA.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>FoodExpress - Home</title>

  <style>
    * {
      box-sizing: border-box;
      margin: 0;
      padding: 0;
    }

    body {
      font-family: Arial, sans-serif;
      background: #fff8f5;
      color: #333;
    }

    /* Navigation */
    nav {
      display: flex;
      justify-content: space-between;
      align-items: center;
      padding: 18px 7%;
      background: white;
      box-shadow: 0 2px 8px #ddd;
    }

    .logo {
      color: #e23744;
      font-size: 28px;
      font-weight: bold;
    }

    nav a {
      text-decoration: none;
```

```
    color: #333;
    margin-left: 25px;
}

/* Hero */
.hero {
    min-height: 500px;
    display: flex;
    flex-direction: column;
    justify-content: center;
    align-items: center;
    text-align: center;
    padding: 50px 20px;
    background: linear-gradient(135deg, #fff0e8, #ffe1e5);
}

.hero h1 {
    font-size: 52px;
    color: #e23744;
    max-width: 800px;
    margin-bottom: 20px;
}

.hero p {
    font-size: 20px;
    margin-bottom: 30px;
    color: #555;
}

.cta {
    background: #e23744;
    color: white;
    border: none;
    padding: 15px 35px;
    border-radius: 8px;
    font-size: 18px;
    cursor: pointer;
}

.cta:hover {
    background: #c91f32;
}

/* Search */
```

```

.search {
  margin-top: 30px;
  width: min(500px, 90%);
  padding: 15px;
  border: 1px solid #ddd;
  border-radius: 8px;
  font-size: 16px;
}

/* Cuisines */
.cuisines {
  padding: 50px 7%;
  text-align: center;
}

.cuisines h2 {
  margin-bottom: 25px;
}

.cards {
  display: flex;
  justify-content: center;
  gap: 20px;
  flex-wrap: wrap;
}

.card {
  background: white;
  padding: 25px;
  width: 180px;
  border-radius: 12px;
  box-shadow: 0 2px 10px #ddd;
}

/* Mobile */
@media (max-width: 600px) {
  nav {
    flex-direction: column;
    gap: 15px;
  }

  nav a {
    margin: 0 8px;
  }
}

```

```
.hero h1 {
  font-size: 36px;
}

.hero p {
  font-size: 17px;
}
}
</style>
</head>

<body>

  <nav>
    <div class="logo">FoodExpress</div>

    <div>
      <a href="#">Home</a>
      <a href="#">Offers</a>
      <a href="#">Contact</a>
    </div>
  </nav>

  <section class="hero">
    <h1>Good Food. Great Mood. Delivered Fast! 🍕 </h1>

    <p>
      Discover delicious meals from your favorite restaurants.
    </p>

    <button class="cta">Order Now</button>

    <input
      class="search"
      type="text"
      placeholder="Search for restaurants or dishes..."
    >
  </section>

  <section class="cuisines">
    <h2>Popular Cuisines</h2>

    <div class="cards">
```

```
<div class="card"> 🍕 Italian</div>
<div class="card"> 🍛 Indian</div>
<div class="card"> 🍜 Chinese</div>
<div class="card"> 🍔 Fast Food</div>
</div>
</section>

</body>
</html>
```

2. Flipkart homepage – 3 user-friendly design elements

1. **Clear category navigation** – Product categories help users quickly move to areas such as electronics, fashion, and groceries instead of searching through the entire site.
 2. **Prominent promotional banners** – Large banners highlight major sales and offers immediately, helping users discover deals without having to search for them.
 3. **Product cards and recommendations** – Product images, prices, ratings, and related products allow users to compare options quickly and encourage further browsing.
-

3. Responsive music-streaming navigation bar

Here is a simple Spotify-style navigation bar using **Flexbox**. It adapts to smaller screens.

```
<!DOCTYPE html>
<html>
<head>
  <title>MusicStream</title>

  <style>
    * {
      box-sizing: border-box;
    }

    body {
      margin: 0;
      font-family: Arial, sans-serif;
    }

    .navbar {
      display: flex;
```

```
    align-items: center;
    gap: 30px;
    padding: 15px 6%;
    background: #121212;
    color: white;
}
```

```
.logo {
    color: #1ed760;
    font-size: 25px;
    font-weight: bold;
}
```

```
.search {
    flex: 1;
    max-width: 450px;
    padding: 12px 18px;
    border: none;
    border-radius: 25px;
    font-size: 15px;
}
```

```
.links {
    display: flex;
    gap: 22px;
}
```

```
.links a {
    color: white;
    text-decoration: none;
}
```

```
.links a:hover {
    color: #1ed760;
}
```

```
@media (max-width: 650px) {
    .navbar {
        flex-wrap: wrap;
        justify-content: center;
        gap: 15px;
    }
}
```

```
.search {
```

```

        order: 3;
        flex-basis: 100%;
        max-width: 100%;
    }

    .links {
        gap: 12px;
    }
}
</style>
</head>

<body>

    <nav class="navbar">
        <div class="logo">MusicStream</div>

        <input
            class="search"
            type="search"
            placeholder="Search songs, artists..."
        >

        <div class="links">
            <a href="#">Home</a>
            <a href="#">Browse</a>
            <a href="#">Your Library</a>
        </div>
    </nav>

</body>
</html>

```

Desktop: Logo, search bar, and navigation appear in one row.

Mobile: The search bar moves to its own row and the navigation remains compact.

4. Movie booking testimonial section

Add this section to a movie-ticket homepage:

```
<section class="reviews">
```

<h2>What Our Movie Fans Say 🎬</h2>

<div class="review-container">

<div class="review">

<div>

<h3>Priya</h3>

<p class="stars">★★★★★</p>

<p>

“Booking tickets was super easy and I found great
showtimes near me!”

</p>

</div>

</div>

<div class="review">

<div>

<h3>Rahul</h3>

<p class="stars">★★★★☆</p>

<p>

“The seat selection was simple and the booking
confirmation arrived instantly.”

</p>

</div>

</div>

</div>

</section>

<style>

```
.reviews {  
  padding: 50px 7%;  
  background: #f5f5f5;  
  text-align: center;  
}
```

```
.review-container {
```

```

    display: flex;
    justify-content: center;
    gap: 25px;
    flex-wrap: wrap;
    margin-top: 25px;
}

.review {
    display: flex;
    align-items: center;
    gap: 18px;
    text-align: left;
    background: white;
    padding: 20px;
    max-width: 400px;
    border-radius: 12px;
    box-shadow: 0 2px 8px #ddd;
}

.review img {
    width: 65px;
    height: 65px;
    border-radius: 50%;
}

.stars {
    color: #ffb400;
    font-size: 18px;
}
</style>

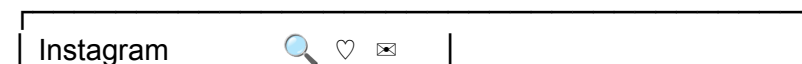

```

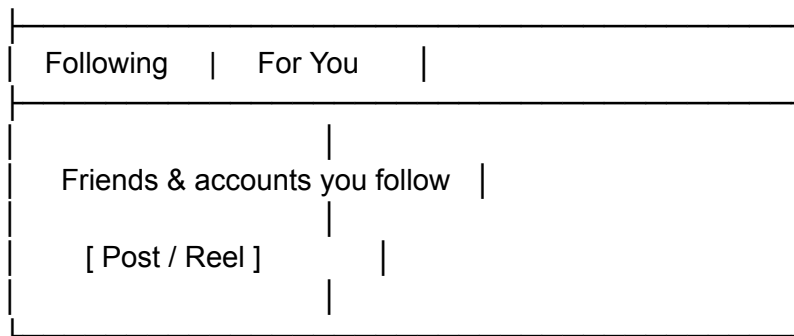

5. Example design improvement – Instagram

Area to improve: The Instagram home feed can sometimes become visually crowded because posts, Reels, Stories, sponsored content, and recommendations compete for attention.

Suggested improvement: Add a clearer “Following” / “Recommended” separation at the top of the feed.

Improved version

This would give users more control over what they see and make the feed feel less cluttered while still allowing Instagram to recommend new content.
