

1. 15-second food-delivery video ad

App: FoodExpress

Offer: 50% off the first order

Video storyboard

Time	Visual	Text on screen
0–4 sec	Delicious pizza/burger shots	Hungry? We've got you! 🍕
4–8 sec	Food being delivered	50% OFF your first order
8–12 sec	App/phone animation	Your favourites, delivered fast!
12–15 sec	Offer + logo	Order Now & Save!

Suggested background music: Upbeat, energetic instrumental music.

2. Flipkart Big Billion Days video script

Script:

 **Big deals. Bigger savings.**

The **Big Billion Days** are here with amazing offers across your favourite products.

Shop now and grab the deals before they're gone!

The AI video editor can turn these lines into scenes with shopping/product visuals, sale graphics, transitions, and background music.

3. Customization

For the finished video, I would make these changes:

- **Background:** Use a bright festive background with blue/yellow sale-themed graphics.
- **Logo:** Add a simple text logo such as “**Flipkart**” in the corner.

- **CTA:** Change the final screen to:

“Shop Now on Flipkart!” 

- Keep the CTA on screen for the final 2–3 seconds so viewers have enough time to read it.

4. Instagram Reel + role of AI

Suggested Reel format: 9:16 vertical, 15 seconds.

How AI helped

1. AI quickly converted the written script into a video sequence with suitable visuals and transitions.
2. AI reduced the time needed to search for images, music, and video templates manually.
3. AI made it easier to create a polished promotional video without advanced video-editing skills.

5. Headline and hashtags

Headline

 **“Big Billion Deals Are Here—Shop, Save & Celebrate!”**

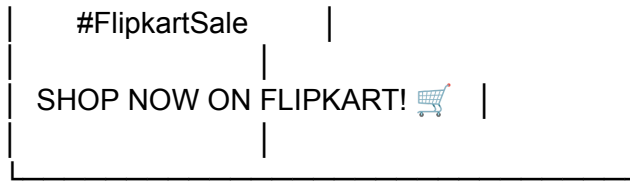

Hashtags

#BigBillionDays

#FlipkartSale

Suggested text overlay

 BIG BILLION DEALS 	
BIG SAVINGS ARE HERE!	
#BigBillionDays	

This gives you the **script, storyboard, customization instructions, AI-process explanation, headline, hashtags, and text overlays** needed for the assignment.
