# 2. One-Page Marketing Plan – Swiggy “Group Order” Feature

| Element                    | Marketing Plan                                                                                                                                                               |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Feature                    | <b>Group Order</b> – Friends can add items to one shared food order.                                                                                                         |
| Target Audience            | College students, office teams, and groups of friends who frequently order food together.                                                                                    |
| Key Message                | <b>“Order Together, Eat Together!”</b> Make group food ordering easier, faster, and more convenient.                                                                         |
| Social Media               | Instagram Reels, YouTube Shorts, and Snapchat posts showing friends using Group Order.                                                                                       |
| Influencer Marketing       | Partner with college, food, and lifestyle influencers to demonstrate the feature.                                                                                            |
| Email & Push Notifications | Send existing users messages introducing Group Order and explaining how to use it.                                                                                           |
| Special Offer              | Give groups a limited-time discount on their first Group Order.                                                                                                              |
| Timeline                   | <b>Week 1:</b> Teaser posts → <b>Week 2:</b> Feature launch → <b>Weeks 3–4:</b> Influencer promotions and discounts → <b>Week 5:</b> Measure results and optimize campaigns. |

# 3. Five digital marketing channels for a new playlist feature

1. **Instagram** – Reels and Stories can reach young music lovers and encourage them to share playlists with friends.
  2. **YouTube** – Music influencers can demonstrate the feature and create sample playlists for their audiences.
  3. **Email Marketing** – Personalized emails can recommend the feature to existing users based on their listening interests.
  4. **In-App Notifications** – Notifications reach users who already use the music app and can immediately encourage them to try the feature.
  5. **Influencer/Social Media Partnerships** – Popular musicians and creators can create their own playlists, making the feature more credible and exciting.
- 

## 4. KPIs for a “Refer & Earn” Cricket Streaming Campaign

1. **New User Sign-ups:** Track the number of new users who join the app through referral links or codes.
2. **Referral Code Usage Rate:** Measure how many people use referral codes compared with the number of referral links shared.
3. **App Downloads from Referrals:** Track the number and percentage of app downloads generated specifically through the Refer & Earn campaign.
