

1. Online marketing techniques

Instagram – Influencer Marketing: Instagram attracts new users through influencer and creator promotions. Popular creators showcase Instagram features and trends, encouraging their followers to join and try the app.

Zomato – Promotional Offers: Zomato uses online discounts, coupons, and app notifications to attract new customers. Limited-time deals create urgency and encourage people to download the app and place their first order.

2. Digital flyer

I can create the food-delivery flyer for you, but image generation and editing require logging in. Once you're logged in, I can generate the finished flyer with referral codes, limited-time offers, and influencer shoutouts.

3. Five types of online ads

Type of ad	Platform	What made it noticeable/skipable
Video ad	YouTube	Bright visuals and catchy music made it noticeable; the Skip Ad button made it easy to skip.
Sponsored post	Instagram	It looked similar to a normal post but had a "Sponsored" label.
Story ad	Instagram	Full-screen design and short videos grabbed attention, but I could quickly swipe past it.
Product ad	YouTube	The product demonstration made it interesting and memorable.
Banner/display ad	Websites/apps	Bold colors and discounts made it noticeable, but repetitive ads were easy to ignore.

4. Playlist feature marketing plan

1. Use SEO with keywords such as "best playlist maker" and "personalized music playlists" on the app's website and blog.

2. Create engaging social media posts and short videos showing how users can make and share playlists.

3. Send email campaigns to existing users announcing the new feature with a direct link to try it.

4. Partner with music influencers to create and share their own playlists using the feature.

5. Encourage users to share playlists with friends using hashtags and social-media challenges.

6. Offer a small reward or special badge for users who create popular playlists.
