

1. Zomato homepage – SEO elements

Looking at a food-delivery website such as Zomato, these are important elements that can support SEO:

1. **Page title** – A title containing terms such as “food delivery” and the location helps search engines understand the page topic.
 2. **Main heading (H1)** – A clear heading tells search engines and visitors what the page is primarily about.
 3. **Text content** – Descriptions about restaurants, food delivery, and services provide relevant keywords that search engines can index.
 4. **Images with alt text** – Descriptive **alt** text helps search engines understand images and also improves accessibility.
 5. **Internal links** – Links to restaurants, cuisines, cities, and other pages help search engines discover and understand the site's content structure.
 6. **Meta description** – A concise description can summarize the page in search results and encourage users to click.
 7. **Mobile-friendly design and page speed** – A fast, usable mobile experience can contribute to better search performance and user experience.

2. SEO-friendly Flipkart product page

SEO Title (under 60 characters):

Wireless Headphones – Bluetooth Headset | Flipkart

Meta Description (under 160 characters):

Buy wireless Bluetooth headphones online with clear sound, long battery life and comfortable design. Explore top headphone deals on Flipkart.

3. YouTube video meta tags

For this task, I would use a video such as “**Google – Year in Search**” on YouTube and inspect its page source.

However, YouTube is a highly dynamic site, so the browser's **View Page Source** may not expose the same simple metadata in an easily copyable form, and the page can change over time.

Example metadata to look for:

- **Title:** Google – Year in Search
- **Description:** The video's description containing information about the Year in Search video and related content.

SEO analysis:

- **Reason 1 – Relevant title:** A concise title containing the main topic helps search engines and users understand what the video is about.
- **Reason 2 – Relevant description:** A descriptive video summary gives search engines additional context and can include useful keywords related to the video's subject.

Tip: To complete the practical part exactly as requested, open your chosen YouTube video → right-click → **View Page Source** → press **Ctrl+F** → search for **og:title** and **og:description**.

4. 10 keywords for latest IPL cricket highlights

1. IPL latest highlights
2. IPL highlights today
3. IPL match highlights
4. latest IPL match highlights
5. IPL cricket highlights
6. IPL highlights today full match
7. IPL best moments
8. IPL match video highlights
9. IPL wickets and sixes
10. IPL latest match video

Top 3 keywords for my blog title

“IPL Highlights Today: Latest IPL Match Highlights, Best Moments & Sixes”

The three main keywords I would target are:

- **IPL highlights today**
- **latest IPL match highlights**
- **IPL best moments**
