4. Edited Campaign Brief for Indian Youth

Original AI-style idea

“Create a Reel showing different moods and matching playlists, ending with the message: ‘What’s your vibe today?’”

Manually edited version

Campaign: 🎧 “Aaj Ka Mood Kya Hai?”

Create short Instagram Reels showing relatable Indian college-life situations—**8 AM lecture, chai break with friends, exam-night stress, gym session, and late-night scrolling**. Match each situation with a suitable playlist and encourage viewers to comment their current mood.

CTA: “*Comment karo apna mood, playlist hum banayenge!*”

Two changes I made

1. **Added Indian/college-life references** such as *chai breaks, 8 AM lectures, and exam nights* because these situations are more relatable to Indian college students.
2. **Changed the language to Hinglish** (“Aaj ka mood kya hai?” and “Comment karo...”) because an informal Hindi-English mix can feel more natural and engaging for the target youth audience.
