

1. App: Instagram — Ways it increases online visibility

1. **Trending hashtags** – Instagram uses popular hashtags to help posts reach people who are interested in specific topics and trends.
 2. **Influencer collaborations** – Influencers and creators introduce products, features, and trends to their large follower bases.
 3. **Reels and trending content** – Short, engaging Reels can be widely shared and recommended, helping Instagram attract more attention and new users.
-

2. Flipkart homepage — Engagement features

I checked the current [Flipkart homepage](#). Three features designed to encourage engagement are:

Feature/Section	How it boosts engagement
Sale & offer banners	Prominent sale promotions encourage users to click and explore deals. Flipkart also maintains a dedicated offers section for live and limited-time discounts.
Product categories	Categories such as mobiles, electronics, fashion, home, and groceries help users quickly find products and continue browsing.
Curated/trending products	Curated product selections and recommendations encourage users to discover additional products and spend more time shopping.

3. Google Trends comparison

Use Google Trends and set:

- **Location:** India
- **Time:** Past 12 months
- **Search terms:** IPL, World Cup, K-pop

Screenshot: Take a screenshot of the comparison graph after applying these settings and attach it to your assignment. Google Trends provides the comparison graph and search-interest data.

2-line observation:

IPL is likely to show the highest visibility among these topics in India, particularly around the IPL season, because cricket has a very large Indian audience and IPL generates strong search interest.

World Cup also creates major spikes around tournament events, while K-pop generally has a more consistent but lower level of search interest in comparison.

4. Food blog Instagram post

Caption:

The ultimate food stop you need to try!

Crispy, cheesy, delicious and totally worth the visit! 🤩🍴

Tag your foodie partner and save this post for your next food adventure. 📌❤️

Follow for more food recommendations, hidden gems, and must-try dishes!
